

My passion for deep space exploration and because of my math and physics background to which I get to apply to these missions.

Observing the universe and conducting research based on the findings is what appeals to me the most when studying the cosmos. I love learning more about the vast universe to which we know so little about

Mission: JWST

Past

Critical Data Provided:

- Galaxy Evolution
- Expanding Universe
- Exoplanets

"Deep Field" Images Show Thousands of distant Galaxies (Universe's Vastness)

Refined The Universe's Age By Measuring The Hubble Constant

Future

85%

- ***
- coming Soon In May 2027
- Complements JWST
- Investigation of Dark Matter & Universe expansion
- Wide Field Capture Images 100 Times The Area of Hubble
- Microlensing For Rogue Exoplanets

★★
-Captured Most Detailed Carin Nebula

★★★★★

-Found Carbon Dioxide 1st time In An Exoplanet's Atmosphere

Present!!

★★★★★

2021 JWST (Infrared telescope)
Observes:
-Early Universe
-Star Formation
-Exoplanets
Detections:
-Atmospheric Compositions of Exoplanets

★★★★

-Analyze galaxy composition & structure & how they grow & merge over time

★★★★★

-Model Galactic Evolution i.e., developing and refining theoretical models of galaxy observation

-Observe and analyze data from distant galaxies & from the earliest galaxies

Mission Summary

NASA's most advanced space telescope that studies the universe's origins and analyzes exoplanets atmospheres with infrared technology.

Launched in December 2021, it studies the universe in infrared wavelengths that allow scientist to observe early galaxies, learn more about planet and star formation and explore exoplanets and search for potential life.

The JWST studies the early years of the universe with infrared technology that allowed us to look back 13.5 billion years into the past and see galaxies being born. It also fulfills the mission of innovate and inspire by having JWST analyze exoplanets atmospheres and learn if its habitable or not and this advanced astrobiology and the people of course is interested in extraterrestrial life.
